

Carbon Reduction Policy Statement

Just Checking has a policy in place to minimise its environmental impact whenever possible. Carbon reduction measures form an integral part of the overall company strategy, enabling us to enhance operating efficiency and to minimise the release of potentially harmful emissions to land, air and water. The company's aim is to achieve net zero status by 2040 or before where practical.

To help us achieve this, the company will:

Minimise waste:

Reusing / Recycling items and materials where viable and ensuring responsible recycling of goods and materials.

Energy Efficiency:

Optimising the use of energy within our office environment, utilizing smart technologies and promoting energy conscious behaviours.

Renewable Energy:

Working towards the use of 100% produced renewable energy.

Travelling and Commuting:

Promote and ensure digital conferencing facilities are available and used where practical to avoid the need for business travel.

Awareness:

Promote environmental awareness and responsibility among employees and suppliers to ensure their support and full commitment for our company objectives and activities.

Current Actions Include:

- We have avoided the use of paper in our office through the use of email and online storage which has significantly reduced the amount of paper.
- All company vehicles are electric.
- Our consumption of fuel and energy is closely monitored and we take care it is not wasted through inefficiency or casualness.
- We have reduced the amount of landfill waste by recycling waste material more efficiently.
- Just Checking has attained ISO 14001:2015 certification in environment management systems and will maintain this accolade as a minimum for all present and future environmental and carbon reduction initiatives.

What we intend to do in the future:

- Where possible we will source materials from suppliers who operate in an environmentally friendly manner and who are geographically local to us to reduce road traffic, costs and carbon emissions. All systems are manufactured in the UK.
- We will ensure our company vehicles, when due for replacement, or future company vehicles are fuel efficient / electric.
- We will encourage employees and suppliers to be aware of carbon emissions and consider the environmental impacts in our purchasing.
